OVER THREE DECADES OF AIR SUSPENSION EXCELLENCE

Arnett is celebrating over 30 years as the trusted leader in aftermarket air suspension parts and accessories for luxury cars, pick-up trucks and SUV's.

Founded by the Arnett family in Punta Gorda, Florida, Arnett has always focused on ensuring customer satisfaction by manufacturing high quality aftermarket products that offer OE form, fit and function at an affordable price.

In the last 30 years, Arnett has grown into a global brand with over 380 SKUs for more than 1700 applications sold by leading distributors world-wide.

For three decades, Arnett has demonstrated a commitment to developing exceptional air suspension technology and earning the trust of distributors, installers and end users. Arnett's long list of innovations and patents has cemented its position as a global leader in aftermarket air suspension replacement solutions.

THE BROADEST COVERAGE OF QUALITY AIR SUSPENSION PRODUCTS & OPTIONS

Arnett offers more than 380 quality aftermarket air suspension products covering over 1700 applications including remanufactured OE air struts, Arnett-designed new air struts, innovative air springs, OES air suspension compressors and coil spring conversion kits.

THE ARNOTT ADVANTAGE

Since 1989, Arnett Air Suspension has been the trusted industry leader in aftermarket air suspension parts and accessories for luxury cars, pick-up trucks and SUVs.

Arnett delivers exceptional innovation to the global aftermarket industry. Our state-of-the-art manufacturing and remanufacturing processes are driven by decades of extensive research and development, now housed in a 6,000 square meter R&D facility. With a trusted global network of premier auto parts distributors, Arnett products have unparalleled availability in the marketplace. Our leadership in the industry is the result of unwavering dedication to:

- ▲ High quality aftermarket products that offer OE form, fit and function at an affordable price
- ▲ Professional, multi-lingual customer service
- ▲ Demonstrated engineering, manufacturing & management expertise
- ▲ Present in TecDoc
- ▲ Fully functioning TecCom
- ▲ Extensive product installation manuals and videos available online

DOING BUSINESS WITH ARNOTT

Our global team works every day to build on the trust and quality the Arnett name has signified to our customers for 30 years. We forge meaningful relationships with every customer and strive to support their continued success. By offering a comprehensive product line at an exceptional value backed by best-in-class support and a trusted global distribution network, Arnett gives its distributors, resellers and installers the necessary tools to maximize their growth opportunities.

Innovative Engineering

Arnett's commitment to OE quality form, fit and function begins with exhaustive engineering. Arnett's advanced designs are not only more durable, but many are also easier to install than their OE counterparts.

Road Tested

From Audi to Porsche, Range Rover to BMW and Mercedes, Arnett has more than 40 test vehicles to ensure that the products they engineer provide the luxury ride and durability that owners expect.

Precision Production

Our precise production processes ensure the highest quality products are built every time, and that our discerning customers only receive the best parts for their vehicles. With facilities in North America and Europe, Arnett has over 30,000 square meters of manufacturing floor space which includes multiple Mazak 5-Axis CNC machines, advanced recharging stations, automated painting and state of the art warehousing.

Comprehensive Quality Assurance

Arnett's Quality Assurance Team is part of the process from development to production. At every step, they make sure that Arnett's high standards of quality, engineering and manufacturing are maintained.

Extensive Testing

Arnett's engineers test every product for form, fit and functionality in both a lab setting and on the company's extensive fleet of vehicles.

Quality Checked

Arnett computer-tests remanufactured shocks and struts as well as compressors for durability and OE functionality.

Superior Components

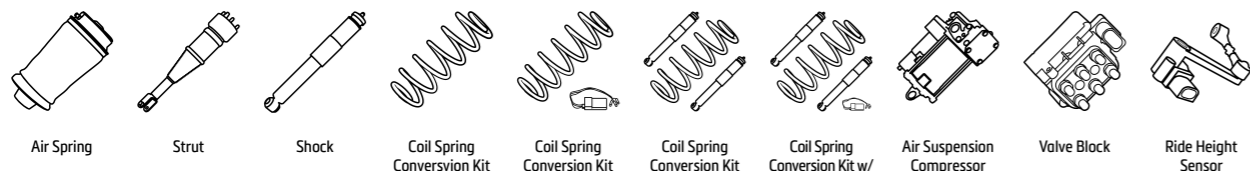

Through the use of OE parts and quality Tier 1 components such as leak-resistant seals, CNC-machined parts, premium name-brand rubber air sleeves, and VOSS air line fittings, Arnett delivers on the superior quality customers can expect with each Arnett part.

Warning Lights

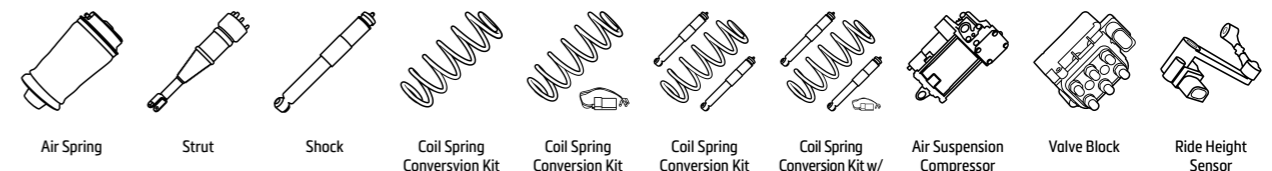

Arnett's patented Electronic Bypass Module is available for most kits and installs easily to turn off any dashboard warning lights once an Arnett Coil Spring Conversion Kit is installed.

ARNOTT REMANUFACTURED AIR STRUT

- Rear right air strut for BMW 7 series (F01, F02, F03 & F04 Chassis)
- OE shock remanufactured in the USA
- Continental ContiTech Air Sleeve
 - > Longer-lasting design using advanced materials
 - > Premium 5-layer, cross-corded construction
- Works with 7 series FlexRay Communications Protocol
- Tested to assure factory damping functionality & performance
- AS-2823

Quality Checked

Arnott computer-tests remanufactured shocks and struts as well as compressors for durability and OE functionality.

- ▶ Long-lasting, premium brand, multi-ply air bladders
- ▶ Improved design installs up to 90% faster than OE
- ▶ Quick, economical repair option

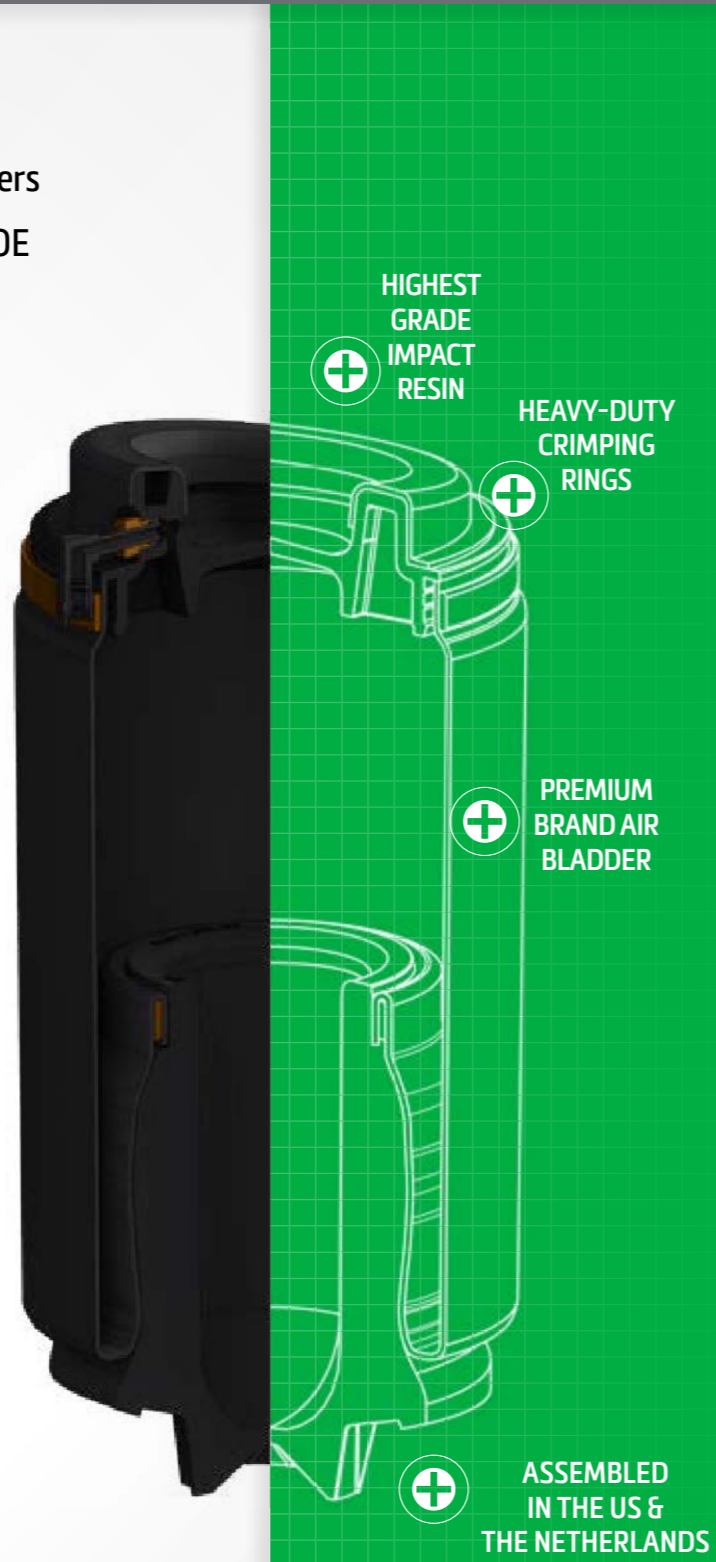

Arnott air springs are engineered for a luxurious ride in the company's 6,000 square meter Research and Development Center. Our air springs undergo extensive testing on a fleet of 40 Arnott-owned vehicles. Driven by our commitment to innovation, several of Arnott's proprietary air spring designs are patented or patent-pending. All provide a cost effective option to air suspension repair.

Durable Multi-Ply Bladders & Inspired Design Add Longevity

Most air suspension problems occur because one or more of a vehicle's air springs have deteriorated and developed leaks. Thin rubber air bladders and seals combined with weak crimping rings are common problems in many low quality knock-offs and some stock air springs. Arnott springs feature multi-ply bladders manufactured by industry-leading companies and are engineered to address the common problems many springs develop.

Optimizing Installation

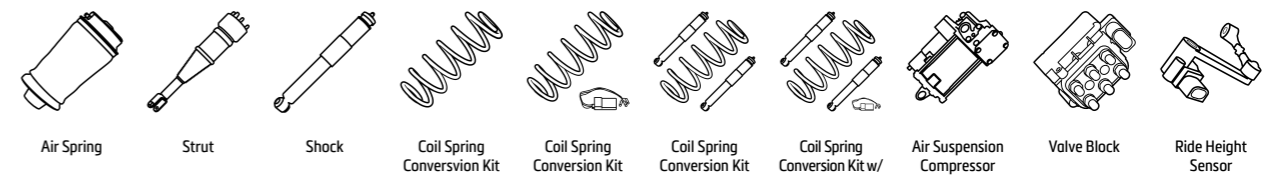

Arnott's innovative air springs for Mercedes-Benz (W211) E-Class and (W219) CLS-Class vehicles do not require the removal of the vehicle's rear sub-chassis to access the air tank reservoir. By optimizing the internal piston and bladder, Arnott air springs save mechanics up to 90% in installation time.

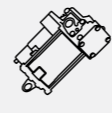

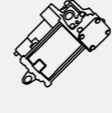

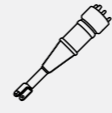

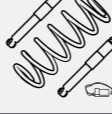

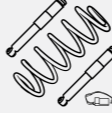

ARNOTT OFFERS AIR SPRINGS FOR:

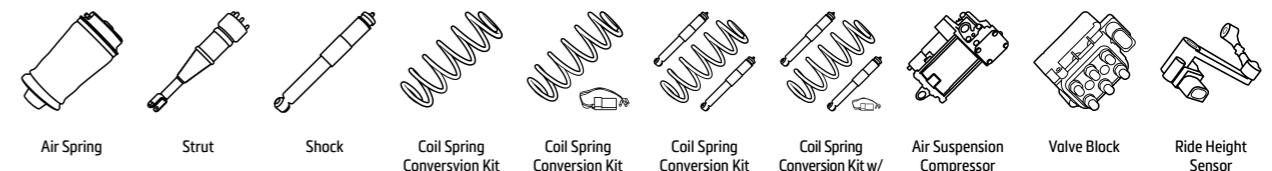

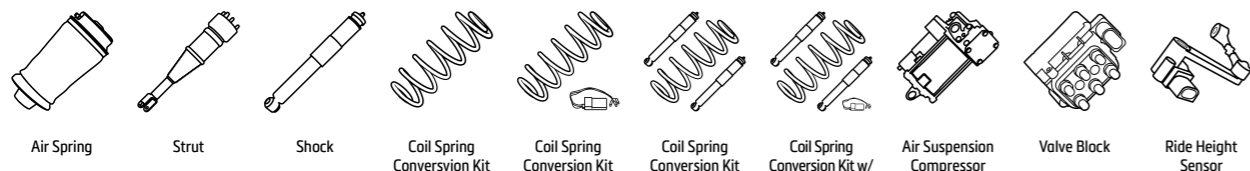

Audi • BMW • Buick • Cadillac • Citroën • Ford • Iveco • Jeep • Land Rover • Lexus Lincoln • Mercedes-Benz • Mercury • Nissan • Oldsmobile • Opel • Porsche • Ram Renault • Saab • Toyota • Volkswagen • Volvo

ARNOTT NEW COIL SPRING CONVERSION KIT

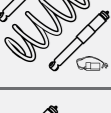

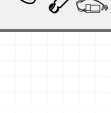

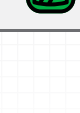

- Front & rear premium coil spring conversion kit for large GM SUVs
- Eibach Shocks
 - > Custom-tuned for high performance handling & stability
- Includes exclusive patented Electronic Bypass Module
 - > Turns off dashboard warning lights
- Specially-tuned, powder-coated rear coil springs made from USA steel
- Installation manual & video for a fast, flawless installation
- C-3185

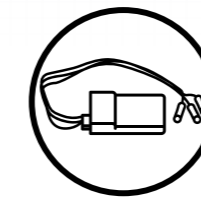

Superior Components

Through the use of OE parts and quality Tier 1 components such as leak-resistant seals, CNC-machined parts, premium name-brand rubber air sleeves and VOSS air line fittings, Arnott delivers on the superior quality customers can expect with each Arnott part.

Struts cycle millions of times over their lifespan. While remanufactured struts offer OE functionality at an affordable price, they eventually wear out and can no longer be rebuilt. Our unsurpassed experience with remanufactured struts led us to truly understand the limitations of some reused components. Given that, Arnott's engineers apply decades of knowledge to each and every new strut they design.

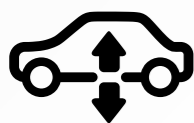

Refined to exacting standards and improving on weaknesses found in OE struts, Arnott's completely new struts are built from the ground up with best-in-class components:

Arnott's ability to make new **custom-valved struts** replicate the OE-like ride drivers expect

Dust baffles and aluminum cans protect the unit from road debris

Arnott's advanced technology eliminates dashboard suspension warning lights

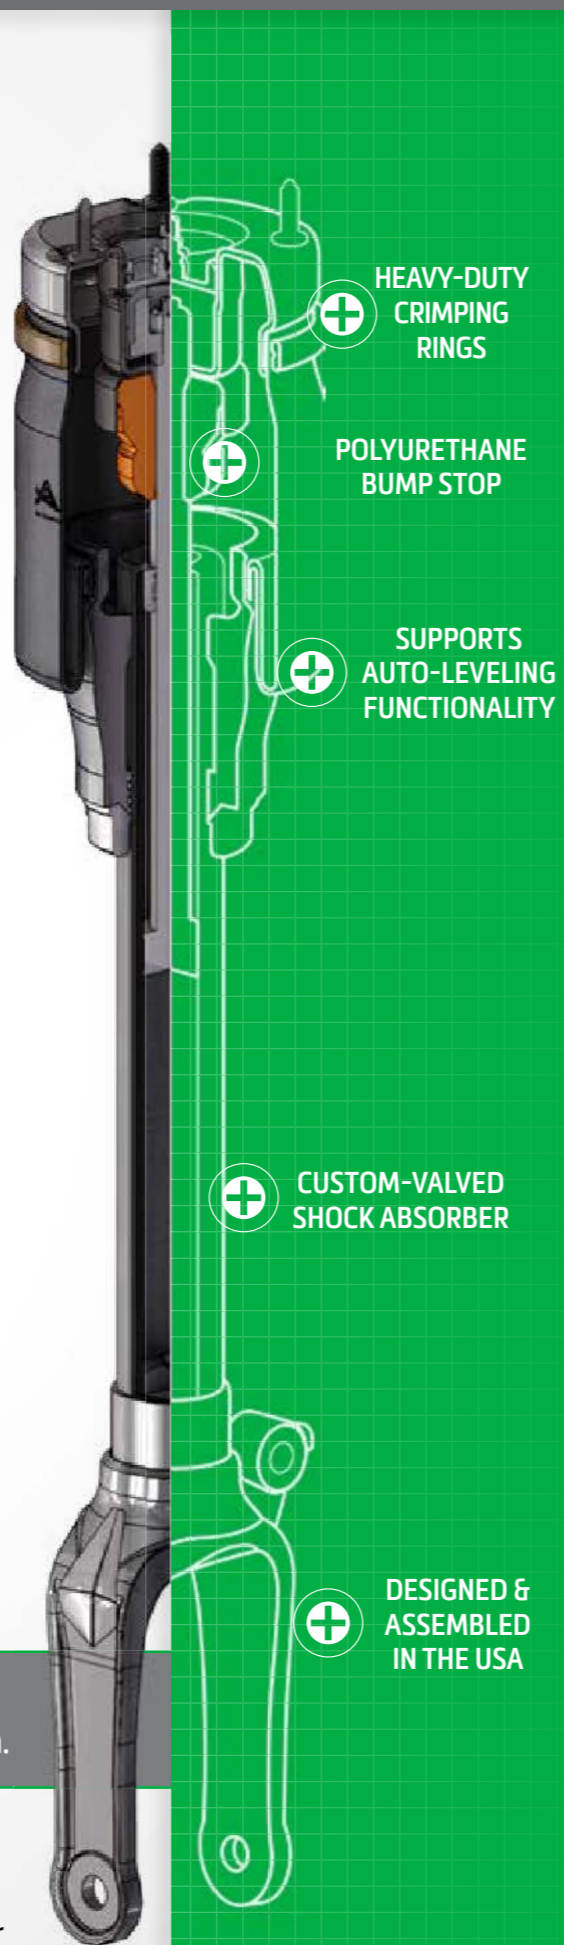

More Tier 1 Components: Longer-lasting seals, new polyurethane bump stops and heavy-duty crimping rings

Replacing an aging air suspension with new Arnott struts yields the comfort, luxury and auto-leveling desired in air struts, with an eye towards cost-effectiveness.

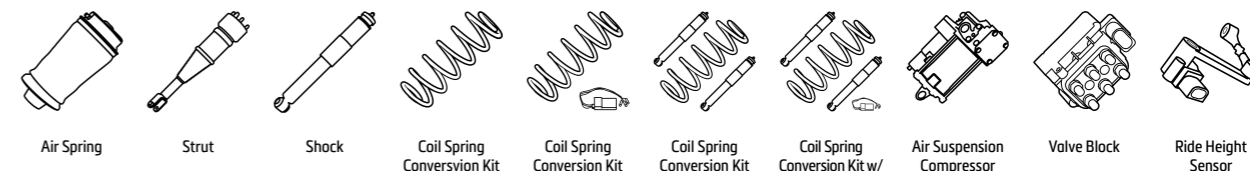

When replacing your old air strut, don't throw away your old core! It might be worth something thru Arnott's core purchase program.

ARNOTT OFFERS NEW AIR STRUTS FOR:

Audi • Bentley • BMW • Buick • Cadillac • Chevrolet • Ford • GMC • Jaguar Jeep • Land Rover • Lexus • Lincoln • Mercedes-Benz • Oldsmobile Pontiac • Porsche • Ram • Tesla • Toyota • Volkswagen

AIR SUSPENSION BASICS

Air suspension systems use a compressor to inflate rubber air springs which may be separate from the shock absorber or combined with the damper as an air suspension strut. Height sensors give the ECU (Electronic Control Unit) a signal when the vehicle is not at a predetermined height. The compressor then pumps air into the air springs until the proper height is reached.

Like all rubber components, air springs and struts are wear and tear parts. Typically, the rubber will dry rot and small cracks can form where the air bladder rolls upon itself. On average, an air suspension part will need to be replaced in six to ten years. Mileage, climate, driving conditions and off-road usage will also influence the replacement rate.

BENEFITS OF USING ARNOTT AIR SUSPENSION

- Trusted for three decades
- Highest quality with superior support
- Broadest aftermarket coverage
- Simplified diagnosis & installation
- Additional turnover and profit
- Additional savings available for workshops

EASY DIAGNOSIS AND REPAIR

At first a driver may notice one corner, side or the entire vehicle sitting lower than normal, but once the car is started the compressor might be able to maintain adequate pressure and ride height. Unless the leaks are fixed, these tiny holes will eventually grow larger than the air compressor can sustain, or the pump may simply burn out due to overheating causing additional expense. At that point, the driver will notice the vehicle is unable to level itself or a dashboard warning light may come on indicating the compressor has failed. If the air suspension is no longer functioning, the customer may not be able to drive it or the ride may be harsh and uncomfortable, making a replacement absolutely necessary. With air suspension now available in the aftermarket, Arnott offers high quality replacement parts at an affordable price.

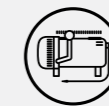

ARNOTT NEW RIDE HEIGHT SENSOR

- Front or rear ride height sensor for 98-11 Mercedes-Benz CLS/E/S-Class and 02-12 Maybach
- Lab tested to 1 million cycles
- Road tested for function and fitment
- Direct fit for fast plug & play installation
- Quality components
 - › Hardware and mounting points for long service life
- RH-3500

WARNING LIGHTS

A dashboard warning light typically indicates an air suspension problem such as a failed compressor. Another common indicator for an air suspension problem is that the car is no longer leveled in the morning.

COMPRESSOR PROBLEMS

An air suspension compressor failure is usually caused by a leak in the system. After replacement, check the air springs and other components and immediately replace any leaking components or the pump will fail again, voiding the warranty.

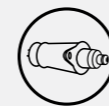

CAR HEIGHT

The height of the car is not determined by the air spring, but by the height sensors.

LEAKS

An air suspension leak is easy to find by spraying the air springs, struts and fittings with a soap and water solution. Bubbles will indicate where the leak or leaks are.

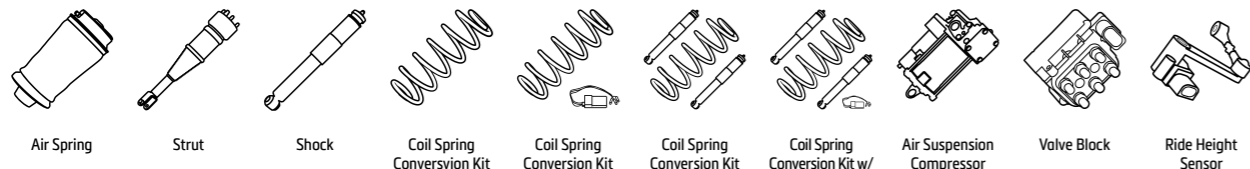

REPLACING REAR AIR SPRINGS

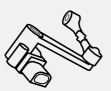

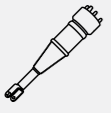

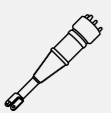

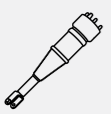

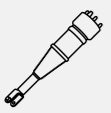

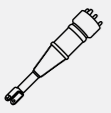

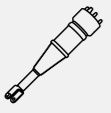

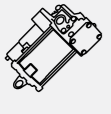

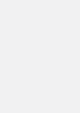

Arnott rear air springs for the Mercedes-Benz E-Class W211 must be replaced in pairs. Arnott improved the air spring and piston design. Installation has become faster and easier because of these improvements. All other Arnott air springs and struts may be used next to the O.E. part.

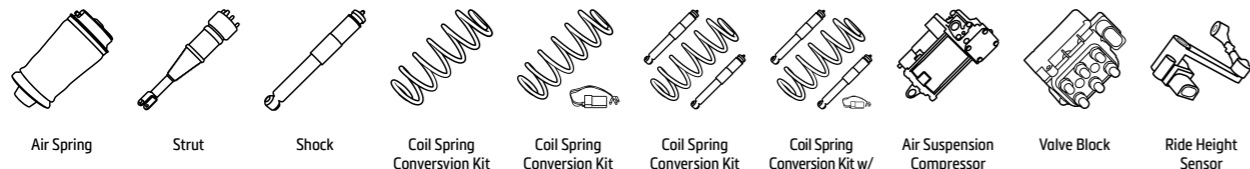

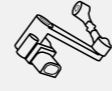

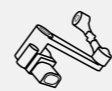

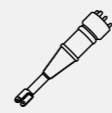

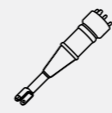

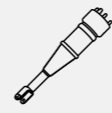

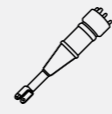

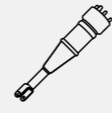

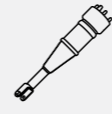

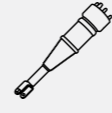

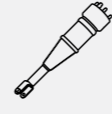

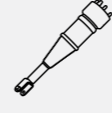

SOFTWARE UPDATES

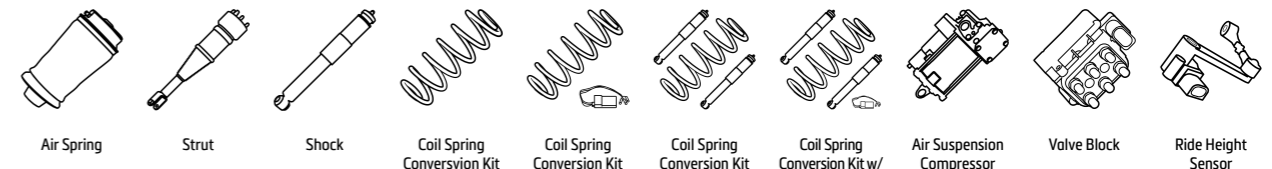

Arnott compressors for Land Rover LR3, LR4 and Range Rover Sport may need a software update after installation. Since Land Rover moved away from Hitachi to another compressor supplier, a software update has become mandatory. Without this update, the compressor may not function well and this could void the warranty.

Road Tested

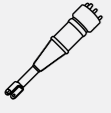

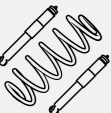

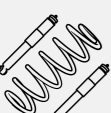

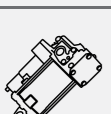

From Audi to Porsche, Range Rover to BMW and Mercedes, Arnett has more than 40 test vehicles to ensure that the products they engineer provide the luxury ride and durability that owners expect.

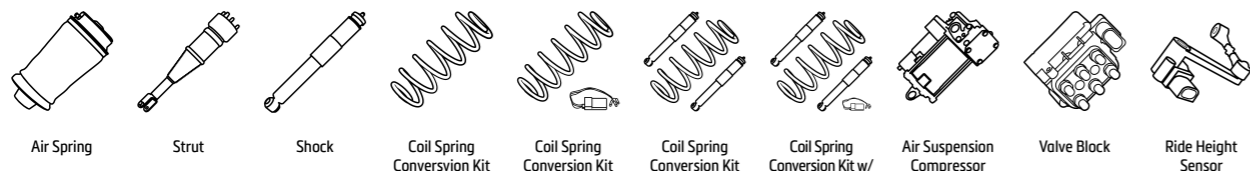

Superior Components

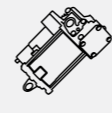

Through the use of OE parts and quality Tier 1 components such as leak-resistant seals, CNC-machined parts, premium name-brand rubber air sleeves and VOSS air line fittings, Arnett delivers on the superior quality customers can expect with each Arnett part.

Arnott has spent three decades redefining the air suspension remanufacturing industry. Our commitment to innovation is unsurpassed, and demonstrated in the care and skill our expert engineers take in improving OE designs, featuring:

- ▲ Factory active damping & ride
- ▲ Exact fit & functionality of OE
- ▲ Arnott-engineered to improve strut longevity
- ▲ Plug & play installation is identical to OE

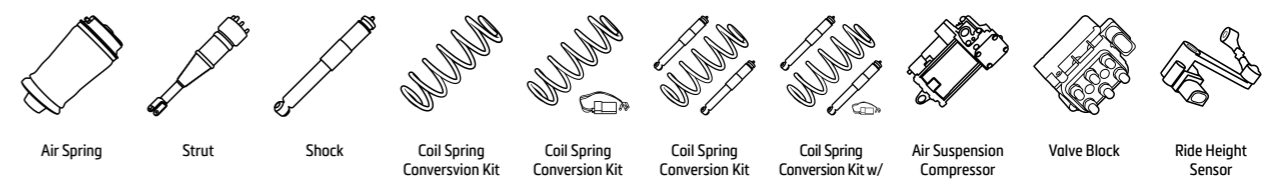

Arnott's remanufacturing processes sets the standard for remanufactured air suspension struts and shocks.

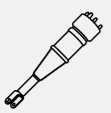

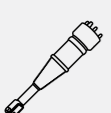

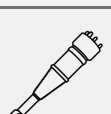

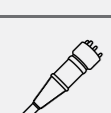

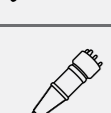

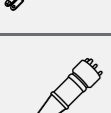

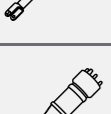

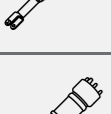

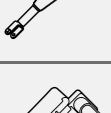

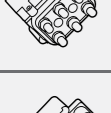

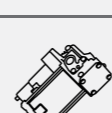

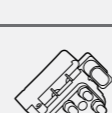

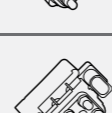

Not only does this environmentally friendly process keep these cores out of our landfills but by reusing the OE shock, Arnott's remanufactured air struts maintain OE active damping functionality while helping customers save money.

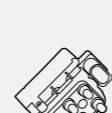

ARNOTT OFFERS REMANUFACTURED AIR STRUTS FOR:
 Audi • Bentley • BMW • Cadillac • Chevrolet • GMC • Land Rover • Maybach
 Mercedes-Benz • Porsche • Volkswagen

ARNOTT NEW AIR SPRING

- Rear air spring for 14-19 Volvo XC90/V90 Estate/XC60 II
- Universal fit
- Continental ContiTech Air Sleeve
 - › Longer-lasting design using advanced materials
 - › Premium 5-layer, cross-corded construction
- Engineered by Arnett for easy installation
- A-3307

INCLUDES MOUNTING BRACKET

PLUG & PLAY INSTALLATION

BUILT TO OE SPECIFICATIONS

EPOXY-ELECTROCOATED BRACKET

Compressor burnout is one of the more frequent air suspension problems encountered by drivers. Burnout occurs when the compressor wears out, usually due to a leaking air spring or other component failure. By establishing partnerships with the leading suppliers of air suspension compressors, Arnett provides direct replacements for these critical components.

Many of our exceptional compressors are vigorously tested in Arnett's facilities to assure a long life and reduced failure rates. They are then fitted with application-specific components, providing fast, flawless, plug and play installation. Unlike some compressors simply modified to fit a vehicle, a growing number of Arnett-supplied compressors are identical to those designed by leading OE suppliers, featuring:

- ▲ High-level integration mechatronics fitted to each unique air suspension
- ▲ Maintenance-free integrated air dryers for a quiet, high-performance ride
- ▲ Thermal overload protection
- ▲ Most compressors from Arnett come fully assembled, including application-specific air lines, wiring harness and brackets

Air Suspension Compressors from Arnett are fully covered against manufacturer's defects if they have not been subjected to burnout from leaking air suspension components, modified, missing labels or damaged by water.

ARNOTT OFFERS AIR SUSPENSION COMPRESSORS FOR:

Audi • Bentley • BMW • Buick • Cadillac • Chevrolet • Citroën • Ford • GMC • Infiniti • Jaguar • Land Rover • Lexus • Lincoln • Maybach • Mercedes-Benz • Mercury • Nissan • Oldsmobile • Peugeot • Porsche • Toyota • Volkswagen

TRUSTED FOR THREE DECADES

Arnott is the authority in replacement air suspension systems.

Innovative Engineering

Precision Production

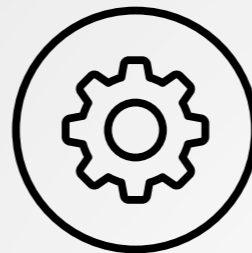

Extensive Testing

ARNOTT-DESIGNED NEW AIR STRUTS

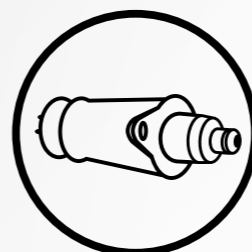

- Custom-valved shock adapts to driving style
- Premium brand air sleeve, bump stop & dust boot
- Works with vehicle's auto leveling functionality
- CNC-machined aluminum or stamped steel top
- Improved seals to prevent leaks
- Many connect to ADS system to eliminate warning lights
- Engineered & assembled in the USA

Innovative Engineering

Comprehensive Quality Assurance

Superior Components

Precision Production

Extensive Testing

REMANUFACTURED AIR STRUTS

- Tested, cleaned & recharged OE shock
- New sealing cap & air line fitting
- Works with vehicle's auto damping & leveling system
- Premium air sleeve, bump stop, air fitting & dust boot
- OE top mount & sensor
- Remanufactured in the USA

AIR SPRINGS

- Premium name-brand air sleeve
- Faster, easier installation
- Engineered & assembled in the USA & EU
- Compatible with OE struts, air line & leveling system
- High-impact polyurethane or aircraft-quality aluminum tops

AIR SUSPENSION COMPRESSORS

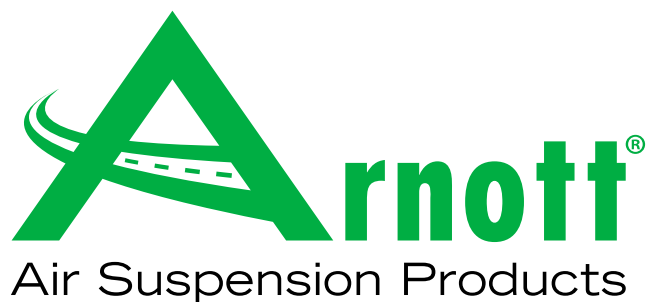

- Compressors meet OE specifications
- Includes thermal overload protection
- Electrocoated epoxy finish to prevent corrosion
- Extensive life-cycle testing
- Most mate with OE lines & plugs for ease of installation

COIL SPRING CONVERSION KITS

- Patented Electronic Bypass Module (EBM) eliminates fault codes
- Custom-valved shock absorbers
- Durable American-made, powder-coated coil springs
- Pre-assembled for easy & safe installation
- OE fit with no modifications needed

Go to Arnott's dealer locator to find the Arnott Authorized Distributor nearest you. Contact the Arnott air suspension experts if you need assistance in finding a local authorized distributor or to answer product questions. Arnott's Customer Service team is available to assist you with what to order, product availability and any other questions you might have regarding Arnott's air suspension.
